change in operators strategy

% of the users who accessed this sites on phone during the year

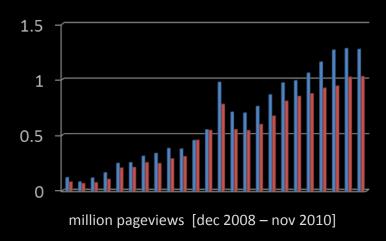

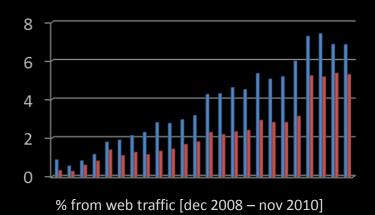

source: nokia UK smartphone study

trend

hotnews realitatea

Highlights

- √ 10 + times growth in traffic in 2
 years
- ✓ The mobile web traffic has reached almost 7% from web traffic
- √ 30% from the hotnews mobile traffic comes from iPhone and Android Apps
- ✓ The mobile operators had only recently started to promote the mobile web/internet (vs. their own portals)

future

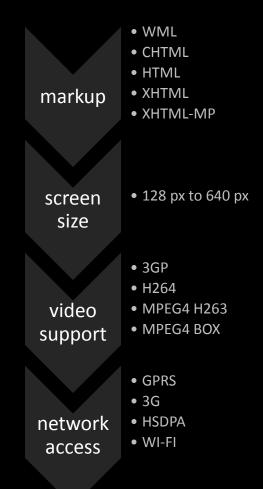

mobile internet users > desktop users (usage) (usage)

within 5 years according to

Morgan Stanley
Gardner

development

problems (fragmentation)

mobile web platform

• realtime device detection

platform identifies every device accessing the mobisite (http://mobilestats.ro/live)

device capabilities database
 thus knowing if it's mobile, its screen size, supporting image and video format etc.

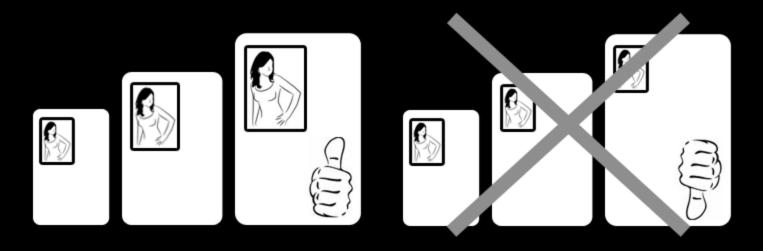

device specific rendering

so it builds the pages accordingly, delivering the optimized version for any device.. iPhone, BlackBerry, Nokia, Samsung, HTC, SonyEricsson and so on

more features

image scaling

displaying proper image thumbnail based on screen size (width)

video transcoding

generating mobile videos in several formats/codecs to be served by download, based on device video format support, obviously

standards and best practices

Compliance tests

AUTO REFRESH and REDIRECTION, CACHING, CHARACTER ENCODING SUPPORT and CHARACTER ENCODING USE. CONTENT FORMAT SUPPORT and VALID MARKUP, DEFAULT INPUT MODE, EXTERNAL RESOURCES, GRAPHICS FOR SPACING, IMAGES RESIZING and IMAGES SPECIFY SIZE, LINK TARGET FORMAT, MEASURES, MINIMIZE, NO FRAMES, NON-TEXT ALTERNATIVES, OBJECTS OR SCRIPT, PAGE SIZE LIMIT, STYLE SHEETS SUPPORT, TABLES ALTERNATIVES...

there are mobile apps ...

Stores:

There are currently 6 major mobile application stores:

More than 4 billion apps have been downloaded from the App Store alone. Google, the second-largest Application Market, does not release those numbers.

In most app sales, the developer's cut is 70% of the purchase price, the exceptions being BlackBerry, giving developers 80% of the purchase price, and third-party stores, who average 60% remuneration.

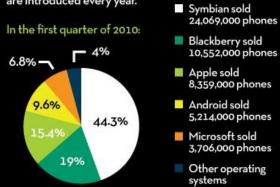

Surveys show the average iPhone user spends \$80 on apps.

On these six stores, more than 305,862 apps are available.

The Market:

Apps are sold to those who have smart phones - so which market has the most smartphones? The smartphone market is quickly changing, as new phones and systems are introduced every year.

mobile web distribution

	Carriers	App Store	Mobile Web
Openness	Closed, seek permission	License Agreement	Open
Entry Cost	Thousands of dollars	\$99	0
Revenue Split	60/40 to 50/50	70/30	100%
Restrictions	Many	Few	None
Releases	Difficult	1 to 2 weeks	Instantaneous
Micropayments	Inconsistent	iTunes	No

apps vs. HTML5

	iPhone App	Safari Browser
Location/GPS	Υ	Υ
Camera	Υ	Y
Accelerometer	Υ	N
Audio/Video	Υ	Y
Offline Usage	Υ	HTML5 Caching
Push Notifications	Υ	N
Set Up Fee	\$99	\$0
Billing	iTunes	card
Approval Process	Y	N

dev framework

app framework

Featuring nearly 100% code reuse across desktop apps and over 80% reuse across mobile apps, Titanium provides a deep, yet highly-reusable development platform

html5 framework

PhoneGap is an open source development framework for building cross-platform mobile apps. Build apps in HTML and JavaScript and *still* take advantage of core features in iPhone/iPod touch, iPad, Google Android, Palm, Symbian and Blackberry SDKs

the open web...

every website should provide an API in order to give access to the content to different clients

- mobile (native) apps
- mobile web apps
- tablet apps (iPad)
